

Method for treating particulate pigments

Abstract

- 5 A process for treating pigments in particulate form, comprising the following steps
  - a) mixing pigment in particulate form with at least one nonionic surface-active substance,
  - 10 b) dispersing the thus obtainable mixture of pigment in particulate form and nonionic surface-active substance in an aqueous medium,
  - c) addition polymerizing at least one first monomer or addition copolymerizing a first mixture of comonomers in the presence of a dispersion obtained after b) to form water-insoluble polymer or copolymer at the surface of the pigments in particulate form,
  - 15 d) adding at least one second monomer or a second mixture of comonomers and addition polymerizing or copolymerizing.
